This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.111 and 1.114. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

## DRAFT

46. **(Proposed Amended)** A processor-readable medium, having processor-executable instructions embodied thereon, that—when executed by a processor—perform a method comprising:

a user selecting a video content, the video content being linked to a stitched-reference play-list, wherein the stitched-reference play-list refers to a single play-list file that is configured to provide instructions in order to implement quick display of at least two one-or-more referenced contents and transitions between the at least two one-or-more referenced contents;

after the selecting, receiving a static image from a content provider, wherein the receiving a static image from the content provider implements the stitched-reference playlist that includes a reference to the static image, wherein the referenced static image is one of:

the first video frame of a video clip representing an introductory section to the video clip, the video clip being one of the referenced contents; or

the last frame of a video clip, the video clip being one of the referenced contents;

displaying the static image for, at least, a fixed duration, by executing a Duration command and a ShowWhileBuffering command implemented by the stitched-reference play-list; and

buffering video content from the content provider during the displaying, wherein the buffering video content from the content provider implements the stitched-reference playlist that includes a reference to the video content,

wherein the static image is displayed beyond the fixed duration if the buffering is not complete when the fixed duration expires.
